

# Community of Practice T&L

## Meeting 1

30 April 2026

The meeting was a kick off meeting that introduced attendees who gave a brief overview for why they joined the team. The meeting discussed on what we're hoping to achieve and reacted to James's video and the other examples of strategies that were shared with the group.

The summary below is a snapshot of the discussion:

-----

1. The main question is that of Audience.. who is the main audience of the strategy? A document for an internal audience will look very different to a document for an external audience.
2. Some schools have a clearer identity than others, we should make sure that the strategy helps mitigate this.
3. WSU strategy stood out because it was responding to a location.. they made a stake to where they are and it gives them an edge over the others. We should capitalise on our location.. when we give highschool workshops abroad, we always say that we are the only city campus and use that as a key selling point. The strategy should reflect this.
4. We had a good discussion on what value we provide as an institution.. if/when AI takes over certain tasks that we do, what is that we offer? The physical experience of a student in our spaces is a value we provide and must claim.
  - a. Attendance is important but we can't mandate it, how do we make our students excited to come to class and be on campus without mandating it?
5. Establishing a strong relationship with alumni is something we strive for, giving them a sense of belonging to a place they were a part of and a reason to return and give back.
6. How do we define creativity, is it based on strategy, industry, output?
7. How do we prepare students for a future that is uncertain? Are our students prepared for pivoting careers if they need to? How do we support students through the anxieties of transitioning from academia to practice?
8. The phrase 'Indigenous knowledges' was used in the various CoP documents however with little to no description as to what that refers to and the extent to which one engages with it. Some are finding its use tokenistic due to the lack of detail given to this term when compared to the other terms in the CoP documents.
9. Moving forward, structuring the weekly meetings around 'themes' of inquiry would be beneficial. Some suggestions are:
  - a. What do we want to be known for, what makes us distinct?
  - b. Student Experience
  - c. Future Uncertainties
  - d. Technology (beyond AI)
  - e. AI
  - f. International Students
  - g. Belonging, Access and Justice
  - h. Knowledge production.. not just delivery
  - i. Interdisciplinarity in the faculty

10. The aims outlined in the ToR are a good reference and starting point:

- Promote cross-school collaboration to innovate in new curriculum
- Find our USP: 'Not Design as Usual' ... "Unconventional Excellence"
- Identifying future infrastructure needs: critical new, critical refresh. Near and long term
- Identify current/future partner states/opportunities for cross-faculty curriculum support
- Supporting and growing our Teaching & Learning excellence and leadership capacity
